
BUILDING A STRONGER FUTURE

TM

Engineering Strength™

FAR REACHING CAPABILITIES

A&P IS A LEADING ENGINEERING SERVICES AND FABRICATION GROUP PROVIDING A RANGE OF DIVERSE SOLUTIONS TO THE GLOBAL MARINE AND ENERGY SECTORS

Our trusted and proven heritage in marine engineering services serves as a catalyst for future development and innovation. We deliver robust solutions that bring lasting success to our clients' business.

We provide expertise, strength and passion to deliver complex projects across all the sectors in which we operate, achieving outstanding results in the most challenging of circumstances.

TRUSTED AND DEPENDABLE

EVERY PROJECT PRESENTS ITS OWN UNIQUE CHALLENGES. A&P CONTINUE TO BE THE TRUSTED PARTNER OF CHOICE FOR CLIENTS WITH COMPLEX REQUIREMENTS.

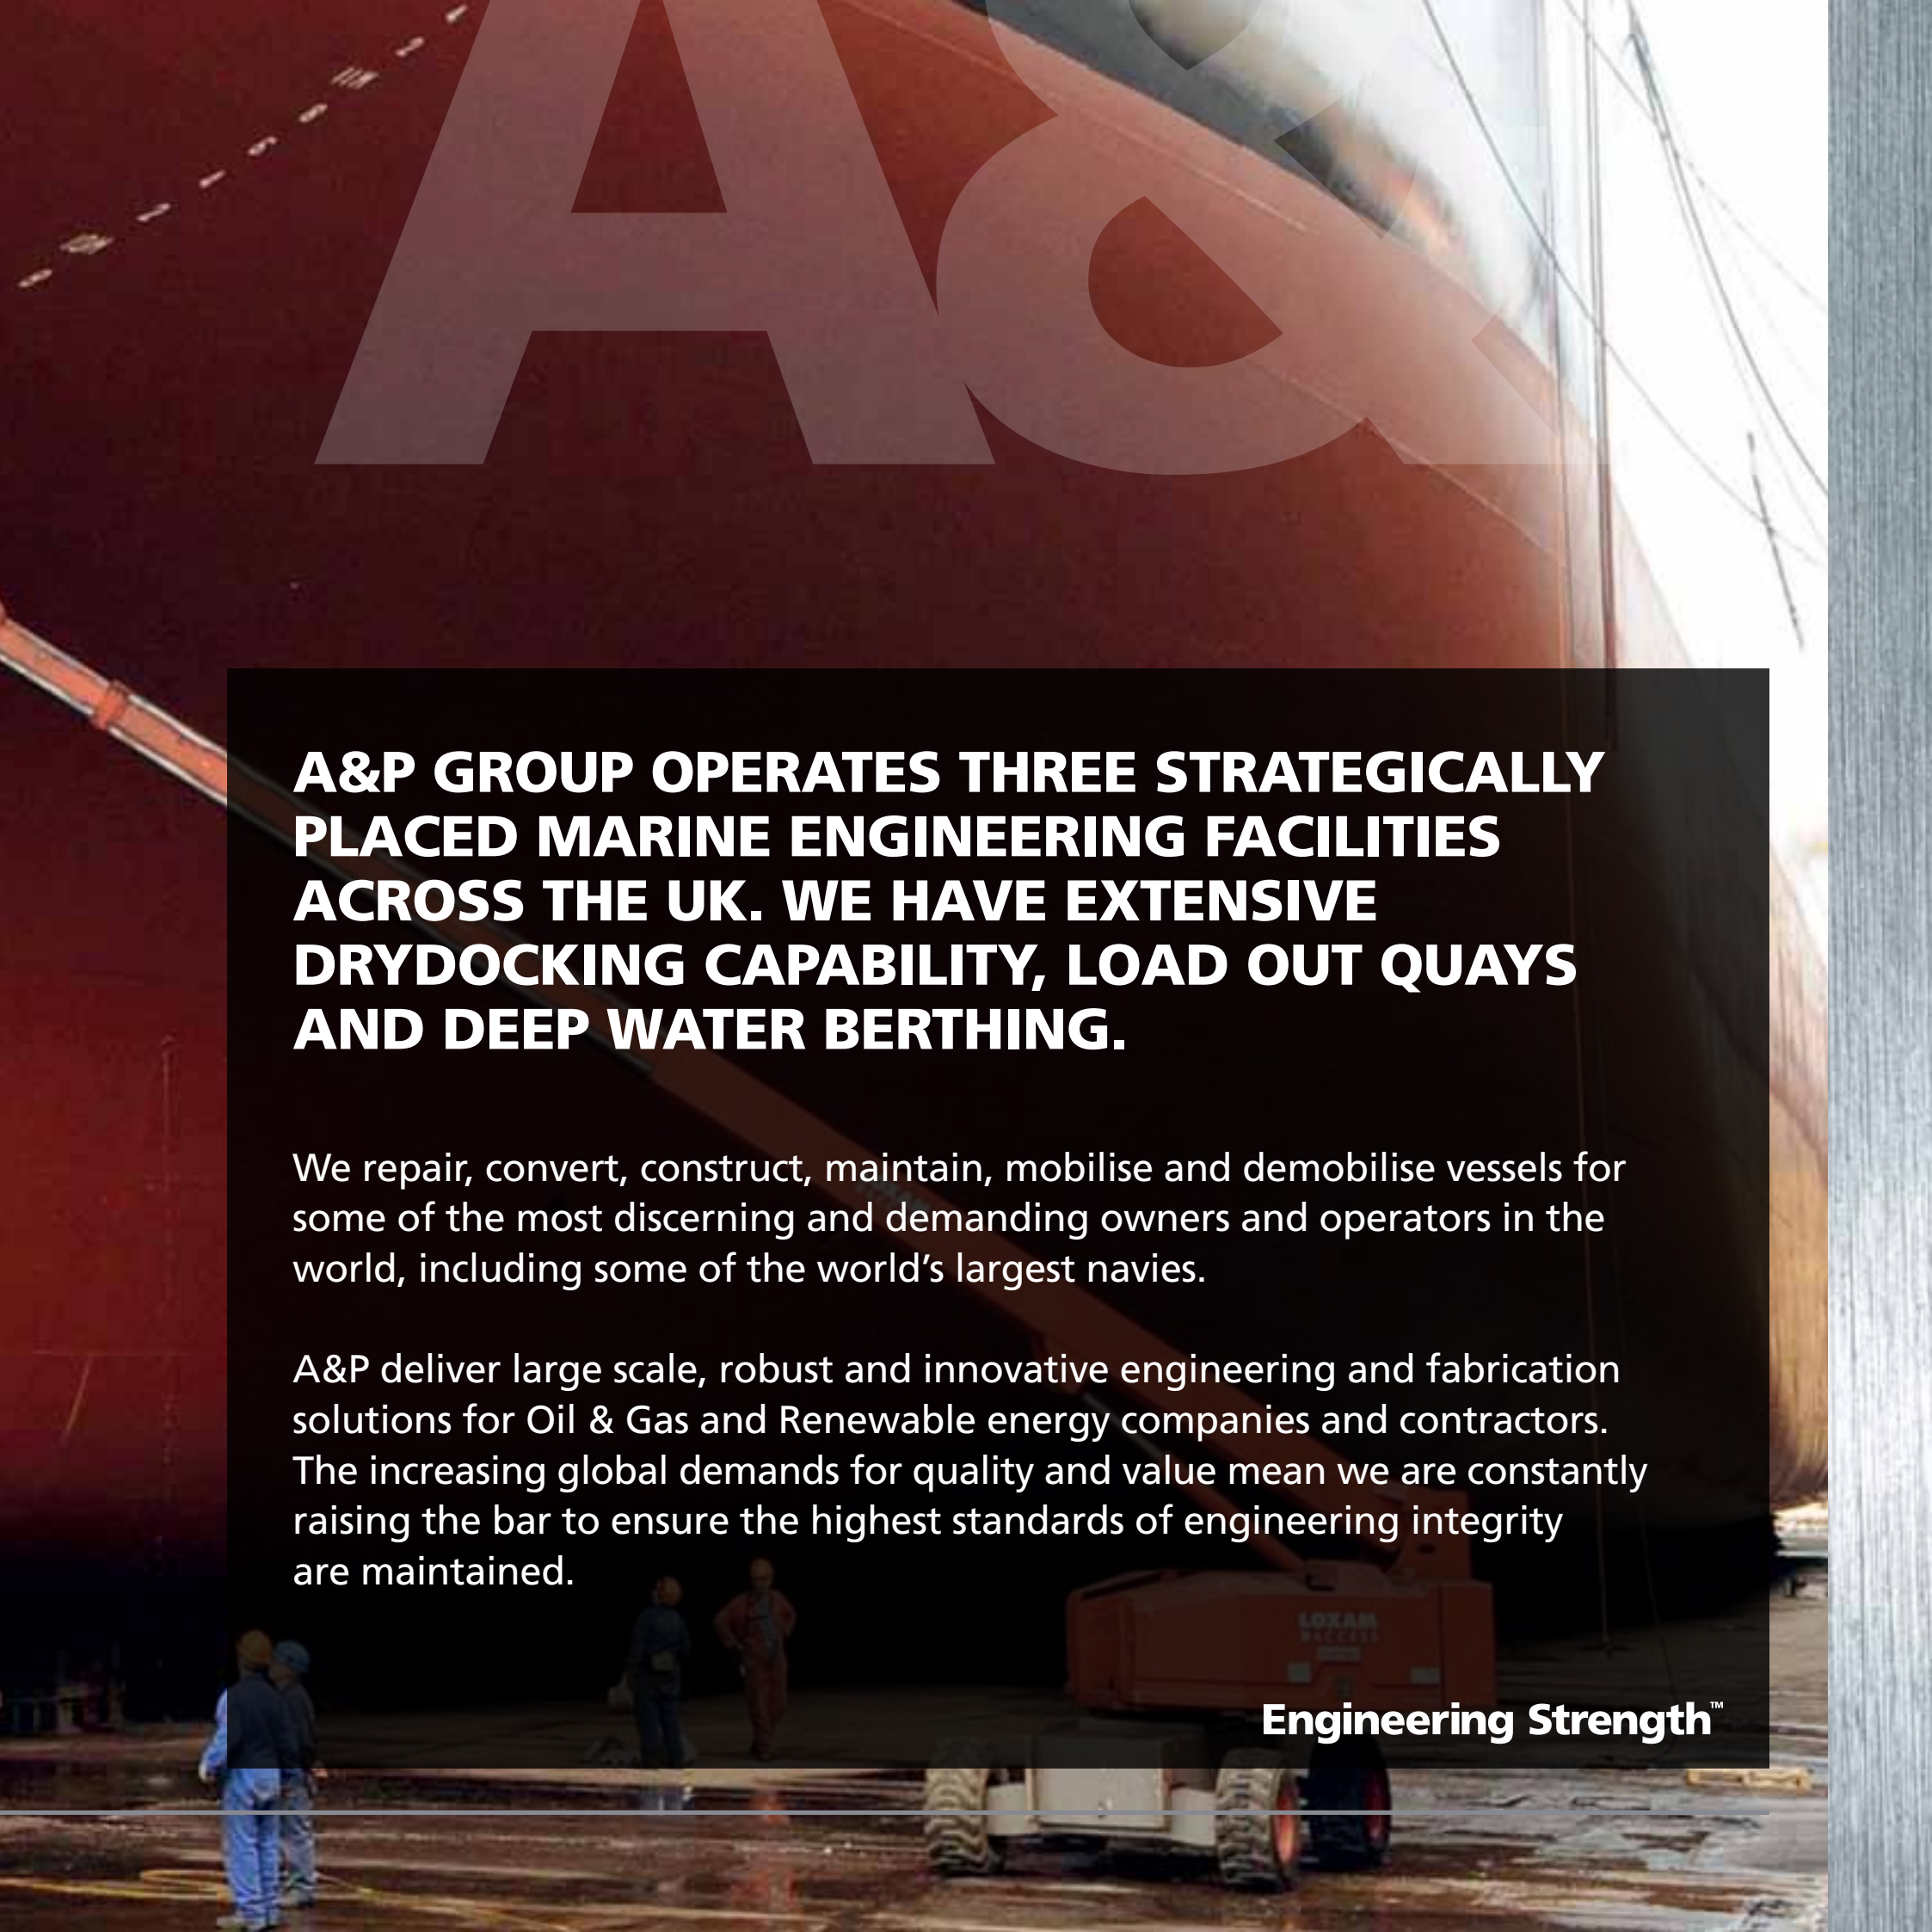

The world's leading marine and energy companies continuously rely upon A&P to deliver multi-disciplined and highly complex marine based projects that are increasingly cost dependent and time sensitive.

We measure our own success by the value we create for our clients.

Engineering Strength™

BUILDING BIGGER, BETTER

A&P GROUP OPERATES THREE STRATEGICALLY PLACED MARINE ENGINEERING FACILITIES ACROSS THE UK. WE HAVE EXTENSIVE DRYDOCKING CAPABILITY, LOAD OUT QUAYS AND DEEP WATER BERTHING.

We repair, convert, construct, maintain, mobilise and demobilise vessels for some of the most discerning and demanding owners and operators in the world, including some of the world's largest navies.

A&P deliver large scale, robust and innovative engineering and fabrication solutions for Oil & Gas and Renewable energy companies and contractors. The increasing global demands for quality and value mean we are constantly raising the bar to ensure the highest standards of engineering integrity are maintained.

Engineering Strength™

**FROM MAJOR FABRICATION
PROJECTS TO THE SMALLEST
REPAIR WELD, WE WORK
TIRELESSLY TO DELIVER
THE HIGHEST STANDARDS**

IMMENSE PRIDE IN THE SMALLEST DETAIL

A&P continue to make significant investment in our state-of-the-art facilities. We have pride in our people and invest in them to promote a culture of safe behaviour, quality workmanship and effective health and environmental responsibility.

We are certified to ISO standards 9001, 14001 and 18001, operating openly, honestly and with the highest regard for minimising the environmental impact of our activities.

Engineering Strength™

INVESTING IN TOMORROW'S ENERGY

WIND
WAVE & TIDAL
OIL & GAS

**THE WORLD'S LEADING ENERGY COMPANIES
ARE UNDER INCREASING PRESSURE TO BRING
NATURAL RESERVES TO THE MARKET.
A&P ARE CONTINUING TO HELP THOSE
COMPANIES EXPLORE NEW POSSIBILITIES.**

A&PTM

Energy

Through our programme of innovation, we are accomplished in the construction, assembly and servicing of major offshore wind, wave and tidal projects, as well as multi-disciplined topside and sub-sea infrastructure for the Oil & Gas sector.

Engineering StrengthTM

The background is a close-up, low-angle shot of a ship's hull. A thick, dark metal chain runs vertically down the left side. The hull is painted in a light blue-grey color with a diagonal ribbed texture. A small, circular logo is visible on the hull, featuring a stylized 'A' inside a circle. A white horizontal bar is positioned above the main title, and a brown horizontal bar is positioned above the list of services.

MARINE ENGINEERING FOR THE NEXT GENERATION

**REPAIR & REFIT
CONVERSION
DRYDOCKING**

**OUR RICH HERITAGE IN SHIP REPAIR, CONVERSION
AND MARINE SERVICES ALLOWS US TO COMMIT
TO A DIVERSE RANGE OF MARINE PROJECTS.**

A&PTM

Marine

Working collaboratively with our clients, we apply flexible working patterns, appropriate skills, techniques and materials to reduce costs and complete projects in the shortest possible timeframe.

A&P has a strong future and continues to set global standards for competitive prices, safety, environmental control and quality of work.

Engineering StrengthTM

DELIVERING BEYOND EXPECTATION

A&P UNDERSTAND THE DEMANDS PLACED ON OUR CLIENTS AND THE CHALLENGES THEY FACE TODAY

Our strength and heritage in marine based engineering make us unique. It is our people and their tenacity, experience and skills that enable us to build better solutions for tomorrow.

Through our own adaptability, resourcefulness and cumulative strength, we continue to lead the way in the services we provide, always aiming to deliver beyond our clients' expectations.
